

FLEXO® F6® FLEXIBLE, SEMI-RIGID WRAPPABLE SPLIT BRAIDED TUBE • 25% EDGE OVERLAP CHEMICALLY INERT • QUIET IN HIGH VIBRATION APPLICATIONS

The unique split, semi-rigid braided construction of F6[®] makes it the ideal solution for situations where ease of installation is of primary importance. The lateral split allows the tube to open up to accommodate a wide variety of bundling requirements, and the semi-rigid braid configuration simply closes around the entire installation without the need for any additional fasteners (Velcro, tape, etc.) The PET braid is lightweight, quiet and flexible. The 25% edge overlap (at nominal diameter) allows coverage around inline plugs, connectors and splices. F6[®] will bend to a tight radius without distorting or splitting open and, unlike full rigid tubing, will not impair or affect the flexibility of harnesses.
