

# **FLEXO® NON-SKID** INCREASED FRICTION ON SMOOTH SURFACES • EXPANDS UP TO 150% MINIMIZES SLIPPING AND ACCIDENTS

Flexo<sup>®</sup> Non-Skid (NSN) is a unique combination of our standard PET material braided together with a matching thread of a high-friction polymer. Non-Skid is engineered primarily for wire and cable management in smooth floor, high traffic environments such as broadcast studios where someone might inadvertently step on a cable snake and slip. As long as there's no excessive pressure on cables protected with Non-Skid, the entire snake glides easily and quietly along the floor. When local pressure is applied, such as someone stepping on the cable, the high friction material comes in contact with the floor and reduces the possibility of the cable sliding out from underfoot. Non-Skid is substantially less "slippery" than our regular PET, yet provides the same level of flexibility and protection from cable wear and abrasion.
