SMD Aluminum Solid Capacitors with Conductive Polymer

FEATURES

- New OS-CON 94SVPD series provides improved characteristics with up to 125 °C temperature capability and 35 V maximum voltage rating in a SMD package
- Improved damp heat (steady state) 85 °C x 85 % RH performance
- Suitable for use in smoothing circuits of vehicle-mounted equipment, industrial equipment, etc.
- This product can support lead (Pb)-free reflow
- Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

Pb-free
RoHS COMPLIANT

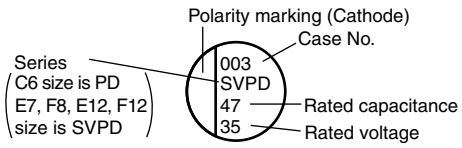
QUICK REFERENCE DATA

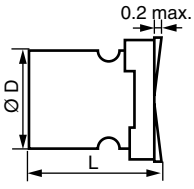
DESCRIPTION	CONDITIONS	VALUE		
Operating temperature range	-	-55 °C to +125 °C		
Capacitance tolerance	120 Hz	M: ± 20 %		
Tangent of loss angle (tan δ)	120 Hz	≤ values in Electrical Data and Ordering Information table		
Leakage current (μA/2 min) (or less) (1)	After 2 min	≤ values in Electrical Data and Ordering Information table		
ESR	-	≤ values in Electrical Data and Ordering Information table		
Characteristics of impedance ratio at high and low temperature	100 kHz, +20 °C	-55 °C	$Z/Z_{20\ °C}$	0.75 to 1.25
		+125 °C	$Z/Z_{20\ °C}$	0.75 to 1.0
Endurance	+125 °C, 2000 h rated voltage applied	ΔC/C	Within ± 20 %	
		tan δ	2 x or < than an initial standard	
		ESR	2 x or < than an initial standard	
		Leakage current	Below an initial standard	
Damp heat (steady state)	+85 °C, 85 % to 90 % RH, 1000 h rated voltage applied	ΔC/C	Within ± 20 %	
		tan δ	2 x or < than an initial standard	
		ESR	2 x or < than an initial standard	
		Leakage current	Below an initial standard	

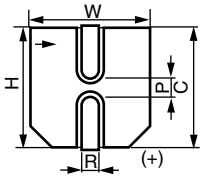
Note

(1) If any doubt arises, measure the current after applying voltage (voltage treatment). Voltage treatment: the rated voltage is applied (10 V to 35 V) for 120 min at 125 °C

DIMENSIONS in millimeters





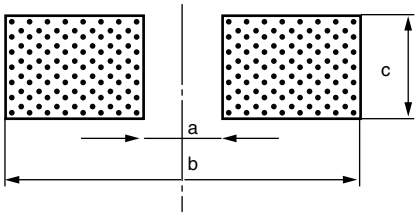


SIZE CODE	Ø D ± 0.5	L + 0.1 / - 0.4	W ± 0.2	H ± 0.2	C ± 0.2	R	P ± 0.2
C6	6.3	5.9	6.6	6.6	7.3	0.6 to 0.8	2.1
E7	8.0	6.9	8.3	8.3	9.0	0.6 to 0.8	3.2
F8	10.0	7.9	10.3	10.3	11.0	0.6 to 0.8	4.6
E12	8.0	11.9	8.3	8.3	9.0	0.8 to 1.1	3.2
F12	10.0	12.6	10.3	10.3	11.0	0.8 to 1.1	4.6

CASE CODE LIST

CAPACITANCE (µF)	RATED VOLTAGE (SURGE AT 125 °C)			
	10.0 (11.5)	16.0 (18.4)	25.0 (29.0)	35.0 (40.0)
8.2				E7
10			C6	
18				F8
22			E7	E12
39			F8	
47			E12	F12
56	C6			
82		E7	F12	

RECOMMENDED LAND PATTERN DIMENSIONS (in millimeters)



SIZE CODE	a	b	c
C6	2.1	9.1	1.6
E7	2.8	11.1	1.9
F8	4.3	13.1	1.9
E12	2.8	11.1	1.9
F12	4.3	13.1	1.9

FREQUENCY COEFFICIENT FOR RIPPLE CURRENT

FREQUENCY	120 Hz ≤ f < 1 kHz	1 kHz ≤ f < 10 kHz	10 kHz ≤ f < 100 kHz	100 kHz ≤ f < 500 kHz
COEFFICIENT	0.05	0.3	0.7	1

ELECTRICAL DATA AND ORDERING INFORMATION

Notes

- n = 30 pieces
- V.P.S. test conditions: 230 °C x 75 s x 2 (V.P.S. = Vapor Phase Soldering method)

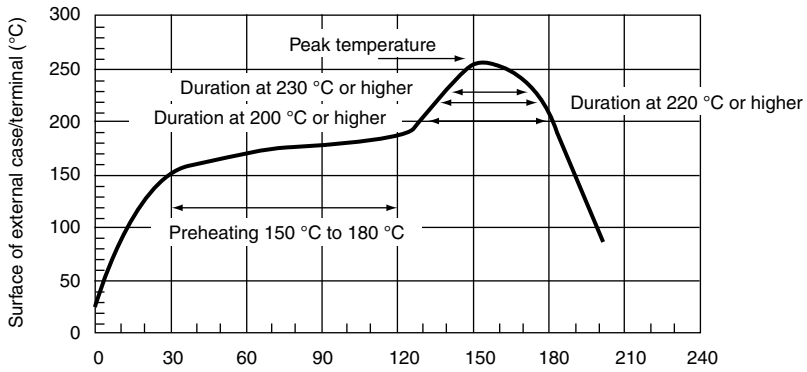
RECOMMENDED REFLOW PROFILE



Vishay OS-CON has different characteristics against soldering heat from conventional aluminum electrolytic capacitors or tantalum capacitors because of its unique materials and structure.

Please note the following points on soldering of Vishay OS-CON 94SVPD series to draw out the best performance.

ITEM	94SVPD SERIES	
Peak temperature (max.)	250 °C	260 °C
Preheat	150 °C to 180 °C 90 ± 30 s	
200 °C over time (max.)	60 s	60 s
220 °C over time (max.)	50 s	50 s
230 °C over time (max.)	40 s	40 s
Reflow number	Twice or less	Only 1 time

Note

- All temperatures are measured on the topside of the Al-can and terminal surface.

Attention:

Reflow soldering may reduce the capacitance of products before or after soldering even if soldering conditions stipulated in Recommended Reflow Condition are met. Though the actual reflow conditions are subject to change depending on the kind of reflow soldering method, please be aware that the peak temperature at the top of Al-case and electrode terminals should not exceed peak temperature. Particular notice should be given to the time that Vishay OS-CON is heated at 200 °C or higher during reflow. Be aware that soldering considerably deviating from these conditions will cause problems such as a 50 % reduction in capacitance, and a considerable increase in leakage current.

The leakage current value may increase (from a few µA to a few mA) even within the above conditions. When the Vishay OS-CON is used in a DC circuit, the leakage current will decrease gradually through self-recovery after voltage is applied. If your reflow profile (reflow temperature, number of reflows, etc.) deviates from the above conditions for mounting the 94SVPD series, please consult with Vishay OS-CON.

Statements about product lifetime are based on calculations and internal testing. They should only be interpreted as estimations. Also due to external factors, the lifetime in the field application may deviate from the calculated lifetime. In general, nothing stated herein shall be construed as a guarantee of durability.

Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, “Vishay”), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.
