

CSPESD304

4-Channel ESD Array in CSP

Product Description

The CSPESD304 is a quad ESD transient voltage suppression diode array. Each diode provides a very high level of protection for sensitive electronic components that may be subjected to electrostatic discharge (ESD). These diodes safely dissipate ESD strikes of ± 15 kV, exceeding the maximum requirement of the IEC 61000-4-2 international standard. Using the MIL-STD-883 (Method 3015) specification for Human Body Model (HBM) ESD, the device provides protection for contact discharges to greater than ± 30 kV.

The CSPESD304 is particularly well-suited for portable electronics (e.g., cellular telephones, PDAs, notebook computers) because of its small package and low weight.

The CSPESD304 is available in a space-saving, low-profile Chip Scale Package with lead-free finishing.
