

## Metallized Polyester Film Capacitors MKT Radial Epoxy Lacquered Type

Dimensions in mm

- (1) Hole  $\varnothing$  1.0 for  $d_t = 0.6$  mm  
Hole  $\varnothing$  1.3 for  $d_t = 0.8$  mm
- (2)  $0 \leq \alpha < 50^\circ$
- (3)  $A = 2.0 + 1.0/-0.5$  mm (pitch = 10.0 mm)  
 $A = 2.5 + 1.4/-0.5$  mm (pitch = 15.0 mm, 22.5 mm and 27.5 mm)

Dimensions in mm

### APPLICATIONS

Blocking and coupling. Bypass and energy reservoir

### MARKING

C-value; tolerance; rated voltage

### DIELECTRIC

Polyester film

### ELECTRODES

Vacuum deposited aluminum

### FEATURES

Available taped on reel and loose in box

- Material categorization:  
for definitions of compliance please see  
[www.vishay.com/doc?99912](http://www.vishay.com/doc?99912)

RoHS  
COMPLIANT

### COATING

Flame retardant epoxy material (UL-class 94 V-0)

### CONSTRUCTION

Wound mono construction

### LEADS

Tinned wire

### CAPACITANCE RANGE (E12 SERIES)

0.001 to 1.0  $\mu$ F

### CAPACITANCE TOLERANCE

$\pm 10\%$ ;  $\pm 5\%$

### RATED (DC) VOLTAGE

63 V; 100 V; 250 V; 400 V; 630 V

### RATED (AC) VOLTAGE

40 V; 63 V; 160 V; 220 V; 250 V

### CLIMATIC CATEGORY

55/105/56

### RATED TEMPERATURE

85  $^\circ$ C

### MAXIMUM APPLICATION TEMPERATURE

105  $^\circ$ C

### REFERENCE SPECIFICATIONS

IEC 60384-2

### PERFORMANCE GRADE

Grade 1 (long life)

### DETAIL SPECIFICATION

For more detailed data and test requirements see "Type detail specification HQN-384-02/101"

**COMPOSITION OF CATALOG NUMBER**

368	10.0 mm
	15.0 mm
	22.5 mm
	27.5 mm

numerically

0.1	2
1	3
10	4
100	5

 Example:  
 104 = 10 x 10 = 100 nF

000	368	XX	XX	X
000	368	XX	XX	X

\* Use this partnumber for those with access to the Vishay's SAP system and Partners web-site within the Americas

**CAPACITANCE**

**IMPEDANCE**

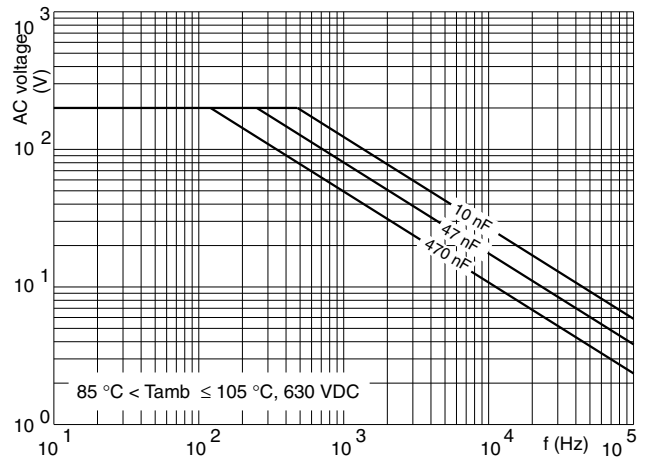

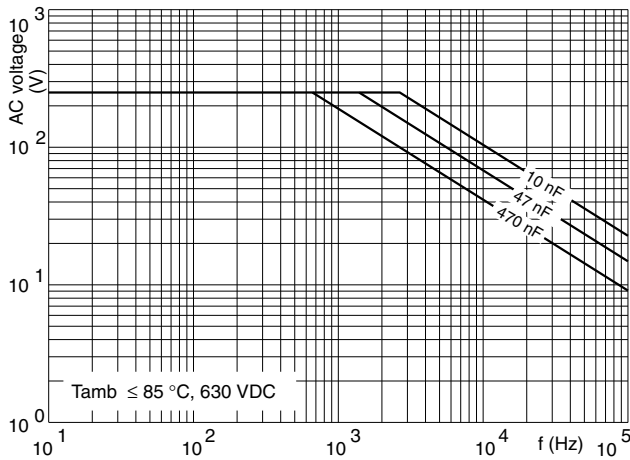

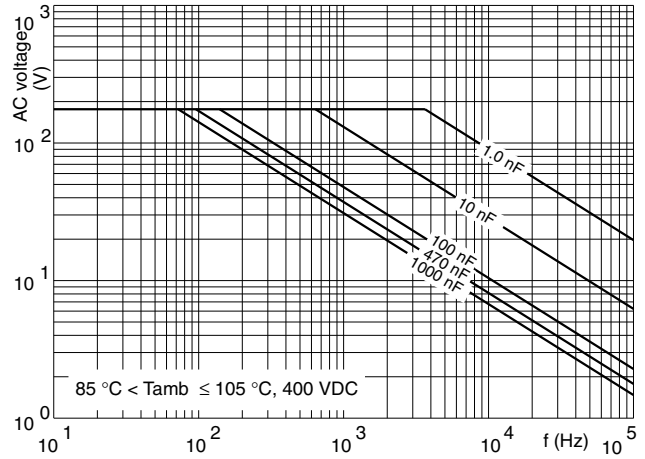

MAXIMUM RMS VOLTAGE (SINEWAVE) AS A FUNCTION OF FREQUENCY

**APPLICATION NOTE AND LIMITING CONDITIONS**

These capacitors are not suitable for mains applications as across-the-line capacitors without additional protection, as described hereunder. These mains applications are strictly regulated in safety standards and therefore electromagnetic interference suppression capacitors conforming the standards must be used.

For capacitors connected in parallel, normally the proof voltage and possibly the rated voltage must be reduced. For information depending of the capacitance value and the number of parallel connections contact [dc-film@vishay.com](mailto:dc-film@vishay.com).

To select the capacitor for a certain application, the following conditions must be checked:

1. The peak voltage ( $U_P$ ) shall not be greater than the rated DC voltage ( $U_{RDC}$ )
2. The peak-to-peak voltage ( $U_{P-P}$ ) shall not be greater than  $2\sqrt{2} \times U_{RAC}$  to avoid the ionization inception level
3. The voltage peak slope ( $dU/dt$ ) shall not exceed the rated voltage pulse slope in an RC-circuit at rated voltage and without ringing. If the pulse voltage is lower than the rated DC voltage, the rated voltage pulse slope may be multiplied by  $U_{RDC}$  and divided by the applied voltage.

For all other pulses following equation must be fulfilled:

$$2 \times \int_0^T \left( \frac{dU}{dt} \right)^2 \times dt < U_{RDC} \times \left( \frac{dU}{dt} \right)_{\text{rated}}$$

T is the pulse duration.

The rated voltage pulse slope is valid for ambient temperatures up to 85 °C. For higher temperatures a derating factor of 3 % per K shall be applied.

4. The maximum component surface temperature rise must be lower than the limits (see figure “Max. allowed component temperature rise”).
5. Since in circuits used at voltages over 280 V peak-to-peak the risk for an intrinsically active flammability after a capacitor breakdown (short circuit) increases, it is recommended that the power to the component is limited to 100 times the values mentioned in the table “Heat Conductivity”.
6. When using these capacitors as across-the-line capacitor in the input filter for mains applications the applicant must guarantee that the following conditions are fulfilled in any case (spikes and surge voltages from the mains included).
7. For continuous use as series connection with an impedance to the mains, please refer to application note [www.vishay.com/doc?28153](http://www.vishay.com/doc?28153)

**Voltage Conditions for 6 Above**

ALLOWED VOLTAGES	$T_{\text{amb}} \leq 85 \text{ °C}$	$85 \text{ °C} < T_{\text{amb}} \leq 105 \text{ °C}$
Maximum continuous RMS voltage	$U_{RAC}$	$0.8 \times U_{RAC}$
Maximum temperature RMS-overvoltage (< 24 h)	$1.25 \times U_{RAC}$	$U_{RAC}$
Maximum peak voltage ( $V_{O-P}$ ) (< 2 s)	$1.6 \times U_{RDC}$	$1.3 \times U_{RDC}$

**Example**

C = 3300 nF - 100 V used for the voltage signal shown in next figure.

$U_{P-P} = 80 \text{ V}$ ;  $U_P = 70 \text{ V}$ ;  $T_1 = 0.5 \text{ ms}$ ;  $T_2 = 1 \text{ ms}$

The ambient temperature is 35 °C

Checking conditions:

1. The peak voltage  $U_P = 70 \text{ V}$  is lower than  $100 V_{DC}$
2. The peak-to-peak voltage 80 V is lower than  $2\sqrt{2} \times 63 V_{AC} = 178 U_{P-P}$
3. The voltage pulse slope ( $dU/dt$ ) =  $80 \text{ V}/500 \mu\text{s} = 0.16 \text{ V}/\mu\text{s}$   
This is lower than  $8 \text{ V}/\mu\text{s}$  (see “Specific Reference Data” for each version)
4. The dissipated power is 60 mW as calculated with fourier terms  
The temperature rise for  $W_{\text{max.}} = 8.5 \text{ mm}$  and pitch = 22.5 mm will be  $60 \text{ mW}/18 \text{ mW}/\text{°C} = 3.3 \text{ °C}$   
This is lower than 15 °C temperature rise at 35 °C, according figure “Maximum allowed component temperature rise”
5. Not applicable
6. Not applicable
7. Not applicable

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and / or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.
