

NCS2004, NCS2004A

Operational Amplifier, Rail-to-Rail, 3.5 MHz, Wide Supply

The NCS2004 operational amplifier provides rail-to-rail output operation. The output can swing within 70 mV to the positive rail and 30 mV to the negative rail. This rail-to-rail operation enables the user to make optimal use of the entire supply voltage range while taking advantage of 3.5 MHz bandwidth. The NCS2004 can operate on supply voltage as low as 2.5 V over the temperature range of -40°C to 125°C . The high bandwidth provides a slew rate of $2.4\text{ V}/\mu\text{s}$ while only consuming a typical $390\ \mu\text{A}$ of quiescent current. Likewise the NCS2004 can run on a supply voltage as high as 16 V making it ideal for a broad range of battery operated applications. Since this is a CMOS device it has high input impedance and low bias currents making it ideal for interfacing to a wide variety of signal sensors. In addition it comes in either a small SC-88A or UDFN package allowing for use in high density PCB's.

Features

- Rail-To-Rail Output
- Wide Bandwidth: 3.5 MHz
- High Slew Rate: $2.4\text{ V}/\mu\text{s}$
- Wide Power Supply Range: 2.5 V to 16 V
- Low Supply Current: $390\ \mu\text{A}$
- Low Input Bias Current: $45\ \text{pA}$
- Wide Temperature Range: -40°C to 125°C
- Small Packages: 5-Pin SC-88A and UDFN6 1.6x1.6
- These Devices are Pb-Free, Halogen Free/BFR Free and are RoHS Compliant

Applications

- Notebook Computers
- Portable Instruments

MAXIMUM RATINGS

Symbol	Rating	Value	Unit
V_{DD}	Supply Voltage	16.5	V
V_{ID}	Input Differential Voltage	± Supply Voltage	V
V_I	Input Common Mode Voltage Range	-0.2 V to ($V_{DD} + 0.2$ V)	V
I_I	Maximum Input Current	± 10	mA
I_O	Output Current Range	± 100	mA
	Continuous Total Power Dissipation (Note 1)	200	mW
T_J	Maximum Junction Temperature	150	°C
θ_{JA}	Thermal Resistance	333	°C/W
T_{stg}	Operating Temperature Range (free-air)	-40 to 125	°C
T_{stg}	Storage Temperature	-65 to 150	°C
	Mounting Temperature (Infrared or Convection – 20 sec)	260	°C
V_{ESD}	Machine Model Human Body Model	300 2000	V

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

1. Continuous short circuit operation to ground at elevated ambient temperature can result in exceeding the maximum allowed junction temperature of 150°C. Output currents in excess of 45 mA over long term may adversely affect reliability. Shorting output to either $V+$ or $V-$ will adversely affect reliability.

DC ELECTRICAL CHARACTERISTICS ($V_{DD} = 2.5$ V, 3.3 V, 5 V and ± 5 V, $T_A = 25^\circ\text{C}$, $R_L \geq 10$ k Ω unless otherwise noted)

Parameter	Symbol	Conditions	Min	Typ	Max	Unit

APPLICATIONS

Figure 31. Voltage Reference

Figure 32. Wien Bridge Oscillator

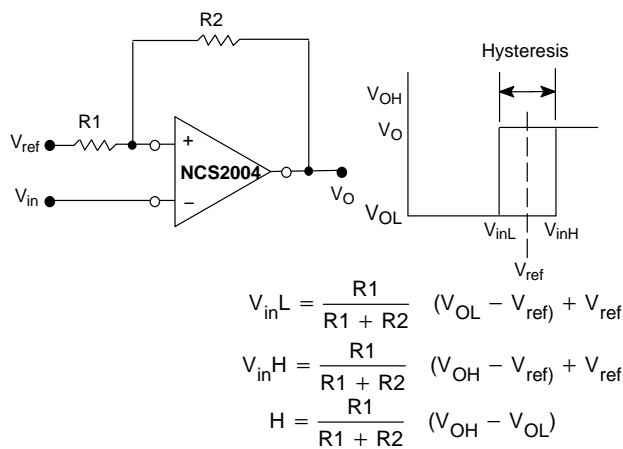

Figure 33. Comparator with Hysteresis

Given: $f_o = \text{center frequency}$
 $A(f_o) = \text{gain at center frequency}$

Choose value f_o, C
 Then: $R_3 = \frac{Q}{\pi f_o C}$

$$R_1 = \frac{R_3}{2 A(f_o)}$$

$$R_2 = \frac{R_1 R_3}{4Q^2 R_1 - R_3}$$

For less than 10% error from operational amplifier,
 $((Q_o f_o)/BW) < 0.1$ where f_o and BW are expressed in Hz.
 If source impedance varies, filter may be preceded with
 voltage follower buffer to stabilize filter parameters.

onsemi and onSEMI are trademarks of Semiconductor Components Industries, LLC dba onsemi or its subsidiaries in the United States and/or other countries. onsemi reserves the right to make changes without further notice to any products herein. onsemi makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does onsemi assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. onsemi does not convey any license under its patent rights nor the rights of others.

onsemi, **Onsemi**, and other names, marks, and brands are registered and/or common law trademarks of Semiconductor Components Industries, LLC dba "**onsemi**" or its affiliates and/or subsidiaries in the United States and/or other countries. **onsemi** owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of **onsemi**'s product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. **onsemi** reserves the right to make changes at any time to any products or information herein, without notice. The information herein is provided "as-is" and **onsemi** makes no warranty, representation or guarantee regarding the accuracy of the information, product features, availability, functionality, or suitability of its products for any particular purpose, nor does **onsemi** assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using **onsemi** products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by **onsemi**. "Typical" parameters which may be provided in **onsemi** data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. **onsemi** does not convey any license under any of its intellectual property rights nor the rights of others. **onsemi** products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use **onsemi** products for any such unintended or unauthorized application, Buyer shall indemnify and hold **onsemi** and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that **onsemi** was negligent regarding the design or manufacture of the part. **onsemi** is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.
